

# DIL Markdown

Rendering Markdown as PDF with DIL template

Joost Diepenmaat <joost@jomco.nl>

A collection of tools for rendering Markdown files as PDF using the Data In Logistics document template.

## Prerequisites

A basic UNIX-like environment with `sed`, `grep`, GNU `make`.

`pandoc`<sup>1</sup> and a fairly complete LaTeX installation; see Creating a PDF in the Pandoc manual<sup>2</sup>

`plantuml`, if `plantuml` source files are used for diagrams.

## Usage

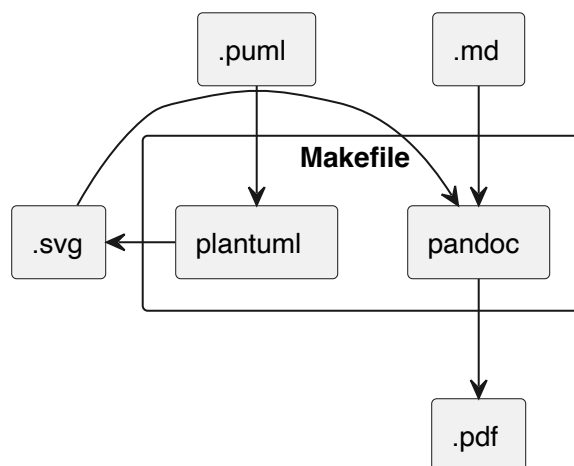

To convert `foo.md` file to a DIL-styled PDF, type

```
cd directory/containing/markdown
make -f path/to/this/repo/Makefile foo.pdf
```

---

<sup>1</sup><https://pandoc.org/>

<sup>2</sup><https://pandoc.org/MANUAL.html#creating-a-pdf>

## LaTeX usage

To use these templates from LaTeX directly (instead of using markdown), set `TEXINPUTS` environment to include the latex directory in this repo, and use

```
\usepackage{datainlogistics}
```

## Example output

Result of processing this README<sup>3</sup>

---

<sup>3</sup>readme.pdf
