A collection of tools for rendering Markdown files as PDF using the DIL document template.

Prequisites

A basic UNIX-like environment with `sed`, `grep`, `GNU make`.

pandoc and a fairly complete LaTeX installation; see Creating a PDF in the Pandoc manual

`plantuml`, if plantuml source files are used for diagrams.

Usage

To convert foo.md file to a DIL-styled PDF, type

```
cd directory/containing/markdown
make -f path/to/this/repo/Makefile foo.pdf
```

LaTeX usage

To use these templates from LaTeX directly (instead of using markdown), set `TEXINPUTS` environment to include the `latex` directory in this repo, and use

```
\usepackage{datainlogistics}
```
